

MGT Professional Services

the difference is ... the way we think ...

Introducing Matthew Tully, Accountant – CPA, Bachelor of Business, Registered Tax Agent, Cert IV Financial Services (mortgage broking). He likes Italian food, sport and would prefer if you called him Matt.

When you work with Matt you can take comfort knowing you are working with a fully qualified professional, **with over 15 years experience**, who takes a **consultative approach and provides customised solutions** when dealing with:

- Personal Tax
- Home & Investment Loans
- Property, and
- Wealth Management Matters

What you will find different about Matt is his ability to “**think outside the box**” and be innovative, creating **outstanding results** for clients **in everyday situations**.

Take Paul and Jan for example; a professional couple who decided to rent out their existing home when they upgraded to a new one. They were managing their commitments quite well and happy with their decisions. However, after meeting with Matt and **implementing his recommendations** they are now in a position to **save over \$237,000**.

It sounds like a lot, and it is, but it is not all that uncommon.

What's more, there were no special deals or budgeting programs involved, just thinking differently and applying years of experience and knowledge.

The downside? Had Paul and Jan met with Matt before buying their first home they would now be in a position to save over \$470,000. **The extra upside?** Apart from saving over \$237,000 **Matt did not charge them for his services**.

Not all accountants are the same; Matt is one that **specialises** in financial matters affecting **you**, the individual. Find out what he could do for you by calling **1300 79 88 65** or email info@mgtps.com.au

Think differently, think innovatively and get outstanding results!
